

# Green electricity certificate

## Renewable energy

Production period : 2021 for the company Keyweb AG in Erfurt  
Produced amount : 3,307 MWh

With this certificate, Stadtwerke Bad Langensalza GmbH confirms that it has acquired evidence of electricity generation from renewable energies for the above-mentioned customers.

The electricity from renewable energy is obtained from hydropower and fed into the European network.

Certificates of origin are issued by the Federal Environment Agency on the basis of the applicable regulations (EEG, HkNV, HkNDV).

The devaluation of the guarantees of origin in the register of origin of the Federal Environment Agency provides proof that the corresponding amount of electricity was generated from renewable energies.

Bad Langensalza, February 3rd, 2021
